My home is going to have a garage to get dirty. My way.

On several occasions my wife indicated it wasn't my best idea to repair my motorcycle engine in the living room. However, I did get it to work and the overstuffed chair hides the stain on the carpet. Now that we are looking for our first new home, I want to make sure I have lots of room to work on my vintage motorbike. I'm going to have a garage for all my tools and parts, so I won't get in anybody's way.
